

DIMENZIJE CILINDARA

KUPAC:

Napomena: Bijelq polja popunjava kupac. Siva polja popunjavaju SISTEMI ZAGREB d.o.o.

Uputa: Cilindar se mjeri na način da izmjerimo širinu vrata na unutarnju i vanjsku stranu od sredine vijka kojim pričvršćujemo cilindar u bravi. Te dimenzije treba upisati u za njih predviđene kućice (pazite na označe "vani" i "unutra"). Zatim je potrebno upisati i širinu štitova ili rozeta koje se trenutno nalaze na vratima. U kućicu "prostor" unesite naziv prostora gdje se ta vrata nalaze, a u kućicu "oznaka" unesite označku koju bi željeli da se nalazi na cilindru i ključu koji ta vrata otvara. Ako ne unesete označku cilindri i ključevi će biti označeni rednim brojem.
